

## Pearl Rethreading Services:

PEKA offers specialised pearl rethreading services, carefully restoring genuine pearl strands to keep them secure, durable, and looking their best.

Normal turnarounds of pearl rethread jobs are **5-10 working days** (subject to season / workload).

*Below is an indicative price list for our pearl rethreading services. Exact pricing depends on size, condition, and requirements of each job:*

- **Grading and Sorting:** This may be necessary for your job and will incur additional charges.
- **Pearl Cleaning:** Cleaning will be at our discretion, with a minimum charge of \$30.00, as it involves individual hand cleaning. This service is intended for slightly soiled pearls only.
- **Drilling Pearls:** The fee for drilling pearls is from \$8.00, which accounts for the time, labour and equipment necessary to ensure the work is completed to a high standard.

**Any threading that involves extra small tasks, such as soldering jump rings or replacing missing parts, and costs under \$10.00 will not require confirmation before proceeding.**

**\* Please note - Newly threaded strands may have slight variations in finished length compared to the original strand.**

**\*All prices exclude GST and are subject to change as the job is carried out.**
